Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 11/12/04 have been fully considered but they are not persuasive.

Regarding the amended claim 1, it merely restates the claim in another words, therefore, does not change the scope of the claimed invention, the cited prior art, Cushman et al (US 6,125,287), still read on the claim in which pressing a key consecutively based on the number of times the key is pressed will activate a different function.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Cushman et al (US 6,125,287).

Regarding claim 1, Cushman et al discloses a key input method for diversifying key functions in a mobile telecommunication terminal, comprising the steps of:

detecting whether or not a user has inputted a key (option key; col 3, lines 10-19);

detecting whether or not the user has consecutively inputted the same key (option key) before elapse of a predetermined time period for consecutive input (col 3, lines 23-27);

if so, performing a different function (deleting the edit function) according to a number of times (i.e. pressing two times the option key) the consecutive input of the same key (col 3, lines 23-27).

Regarding claim 2, Cushman further discloses the key input method of claim 1, further comprising a step of performing an original function (edit only function) of the inputted key when the user has not consecutively inputted the same key (pressing once the option key) before elapse of the predetermined time period for consecutive input (col 3, lines 10-19).

Regarding claim 3, Cushman further discloses the key input method of claim 1, wherein the key is one of a plurality of alphanumeric keys (the key can be the 2 key) in the mobile telecommunication terminal (col 4, lines 23-26).

Regarding claim 4, Cushman further discloses the key input method of claim 1, wherein the key is one a plurality of functional keys (option key) in the mobile telecommunication terminal (col 3, lines 10-19).

Allowable Subject Matter

4. Claims 5-9 are allowable over the cited prior art.
5. The following is an examiner's statement of reasons for allowance:

Regarding claim 5, Cushman et al disclose a key input method for diversifying key functions in a mobile telecommunication terminal (col 1, lines 53-56), comprising:
Cushman et al fail to further disclose:

detecting whether or not a user has set a scroll function when displaying a menu screen;

if so, detecting whether or not the input state of the key set for a scroll function is maintained for a predetermined period of time;

controlling the position of a cursor positioned on the displayed screen depending on maintenance of the key input state for the predetermined period of time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
